

## USER GUIDELINE

Thank you for choosing MOON LUXEIJUM series headlight!  
\*For using this product safely and conveniently and keeping it well-preserved, please read this manual carefully before using. Please save this manual for future reference.

\*Due to the improvement of the product, the product you bought may not be exactly in accordance with the introduction of this manual. We apologize for that.

### SPECIFICATION

- \*1 pc CREE XP-E LED
- \*Rechargeable lithium polymer battery (3.7V 550mAh)
- \*USB rechargeable
- \*Water resistant headlight with durable aluminum alloy body
- \*6 modes : Over drive / High / Standard / Flashing / Strobe / SOS
- \*Quick release handlebar mount (fits 20-40mm)
- \*Low battery, charging and fully charged indicator
- \*Automatic fully charged cut-off system
- \*High precision optical lens

### CONTACTS INCLUDED

#### CONTENTS:

- \* LX-100
- \* Lithium polymer battery
- \* USB cable
- \* Handlebar rubber strap
- \* Rubber base

### LIGHT OPERATION

1. Press the power button to choose the modes:

In this method three modes are cycle.

2. Fast press two times the power button to change into the strobe and flashing modes. Fast press two times back to the first cycle.

3. Press and hold the on / off button around 0.5 second to turn off.

### HOW TO MOUNT THE HEADLIGHT

1. Choose the strap to fit in the bar.
2. Make sure the strap is click in place of the hook.
3. Hold the light on the handle bar.
4. Wrapping rubber strap around bar and stretching strap around hook to secure.

1.

RS-A  
20 - 25 mm

RS-B  
27 - 40 mm

2.

3.

### BEAM ADJUSTMENT

To adjust the horizontal beam, spin the headlight left to right for your best side to side beam angle. To adjust the vertical beam angle, loosen the mounting and rotate the light up and down to your best vertical beam angle, then tighten the mounting.

The beam is widely dispersed, besides its high brightness. To prevent from blinding the oncoming vehicles on the public roads, you'd better adjust the angle downward.

### THE BATTERY REPLACEMENT

#### Battery release

1. Twist the screw anti-clockwise until release the base cover & rubber pad.
2. Use two finger to hold the light body when release the battery from the light.

### INSTALL THE BATTERY

#### Battery installation

1. Do not up side down the slot.
2. Align the slot until it clicks into place.
3. Fold up the battery install into the light.
4. Twist the remain wire into the light of the remain sapce.
5. Twist the screw clockwise until install the base cover.

HOW TO CHARGE BATTERY

**Attention:** MOON would like to recommend you to use the original supplied USB cable to charge the battery. The battery will be damaged if you use any other USB cables to charge the battery. Unplug the light, charger and cable once the battery is fully charged.

\* When the indicator turns flashing red, it means the battery is low. You'd better charge the light right now.

Charging indicator  
\* Flashing blue - charging  
\* Solid blue - charged

Low battery indicator  
\* Flashing Orange

1. Find the charging place at the back of the light.
2. Lift the rubber cover and you'll see the charging port.
3. Plug the USB cable to your computer USB port.
4. Plug the charger cable to the light charger port.
5. The charging indicator shows slow flashing blue when the light is charging, after fully charged it changes to steady.

6. It is normal that the battery may get high temperatures during charging (up to 104°F/40°C), as the chemical in battery is in reaction. If the battery is not drained completely before charging, it may also get warm.

7. Several factors can influence the battery's durability: type of cell strain, the maintenance routine, the temperature and etc. Normally speaking, the higher the battery capacity, the longer the burn time.

8. The battery capacity may become ineffective about 80% of its value after 300-500 charge/discharge cycles. The battery may has 3 years life span under good care.

9. The battery voltage and capacity decrease apparently at low temperatures, especially near or below ice point. The capacity decreases 5%-10% at freezing (burn time decreases 50%). At -20°C, the capacity decreases 30% (burn time decreases 70%). The battery performance will return normal when the temperate gets up to 70°F/20°C. The battery will lose around 1% of its capacity per day when you store the battery at normal room temperature. Battery temperate should never exceed 104°F/40°C, it will lose about 5% of its capacity per day.

10. If you donot use the battery for a long time, be sure to make it a fully recharge every 3 months before storing again. Please keep the battery in cool and dry place when storing.

SIMPLE PROBLEMS ANALYSIS AND SOULUTION

- 1. Problem: The light is not on**  
Solution: Check if the battery still has power  
Check if the power button is pressed hard  
Check if the battery is installed correctly
- 2. Problem: The light turns off over rough terrain**  
Solution: Check if the battery is fully inserted.

HOW TO CLEAN AND CARE THE LIGHT

\*Make sure to clean the dust and dirt on the light with soft damp cloth after every ride.  
\*Water resistant is for rain water only. Do not submerge the battery or the whole light into water when cleaning.  
\*Once you start using the light, you'd better keep using it. When you have to stop using for a long time, please take off the battery to keep well.

**CAUTION:** When riding at night, please follow the guidelines below:

- \*Carrying a flash light is recommended.
- \*Use caution when handling, the light may get hot.
- \*Unplug the headlight if no use.
- \*Unplug connector by the plug, never by the cable.
- \*Do not amend or replace any parts with Non-MOON parts.
- \*Provide sufficient airflow to the headlight for cooling during use.
- \*Do not control any part of the system under water.
- \*Do not look directly at light.
- \*Do not leave the light on and unattended.
- \*Keep headlight away from fire and combustible materials.
- \*Do not store head unit when hot or straightway after use.
- \*Unplug the USB cable when fully charged.
- \*This light is for bicycle use only.

WARRANTY

MOON warrants to the original purchaser of this product that the product is free from defects in material and workmanship for a period of one year. This warranty does not apply to damage due to heat, physical damage resulting from abuse, neglect, improper repair, improper fit, or alterations of the fixture. This warranty is in lieu of all other agreements and warranties, general or specific, express or implied and no representative or person is authorized to assume liability on behalf of MOON in connection with the sale and use of this product.

MOON reserves the right to request the return of any product submitted for warranty consideration. All customers should contact the local dealer or regional distributor for warranty service.

To make a claim, first call local dealer or regional distributor. Some issues may be resolved upon the initial call. If return of the product is necessary, please refer to the following instructions:

- \*We recommend that items be sent by a traceable method (such as FedEx or UPS). MOON is not responsible for lost or misdirected packages.
- \*Please include your full contact information (name, address, phone number, and email [if applicable]), and a description of the issue.
- \*Address items to: local dealer or regional distributor

What is not covered: MOON Lights are covered by a ONE YEAR LIMITED WARRANTY from the date of purchase. This covers the lights and cables only. It does not cover the battery or battery internals.

Batteries are covered by 120 days warranty.
